Reported links, assigned configurations and version boundaries
(a) 78Br: Liu et al. (2016) labels
(b) 74As: Xiao et al. (2022) labels
Band 1: positive parity
Assigned πg9/2 ⊗ νg9/2
Fig. 1 extends to (20+)
Links
Band 2: positive parity
Chiral-partner candidate
9+ to 13+
8 reported
E1 links
Other cross-parity links
not reported here
Band 3: negative parity
Assigned πf5/2(p3/2) ⊗ νg9/2
Fig. 1 extends to (19−)
Links
Band 4: negative parity
Lowest 6−; top (14−)
404.3-keV link from 7−
Partner assignments are interpretations.
A missing line is not a measured zero rate.
Schematic positions; parentheses retain tentative spin assignments.
Band 1: positive parity
6+ to (16+)
Chiral-doublet candidate
Links
Band 2: positive parity
7+ to (14+)
Chiral-doublet candidate
3 reported E1 links
372.4,919.4,1293.4keV
Thesis and journal
share experimental lineage
Band 3: negative parity
Fig. 1 includes low 5−, 6−
Extends to 14−
2019 thesis labels
Negative Bands 3/4
No unique 2022 label mapping
The historical thesis box has no connecting edge:
it does not identify a journal partner band.
Schematic positions; parentheses retain tentative spin assignments.
